

Spring Term
2023

Year 6 Curriculum

French:

This term in Year 6, we will be learning about different places that we can live including our houses and describing our bedroom in detail. We will also be learning about telling the time in French and describing our timetable including extracurricular activities.

Computing:

This half term in Year 6, we will be learning to collect and organise data using excel. Then we will be presenting this data in different ways including charts.

History:

In history lessons, we will be learning about life through the centuries and which historical events have impacted us. We will look at specific points in history in living memory as well as the points we have studied since Year 3.

Science:

This term we will be exploring the topics of electricity and animals including humans. During the first half term we will learn all about different symbols before making and testing different circuits. Then in the second half term we will learn all about the circulatory system and blood flow. We will learn about the function of the heart and how this supports blood flow around the body. We will also learn to measure our pulse at resting and when exercising before investigating real life results.

Music: This term we will be bringing all the knowledge we have learned over our time at TMA to write a song in small groups. This will involve our knowledge of pitch, melody, accompaniment, chords, rhythm and texture, and will be recorded at the end of the spring term.

Art: During the first half term, we will be investigating digital designers. We will look at the works of David Hockney and Luca Damiani investigating colour, pattern and form through digital techniques.

DT: In DT after half term, we will be developing our understanding of mechanics and joining. We will go through the process of designing with purpose and developing and making before evaluating and refining.

PE:

This term, we will take part in a series of Handball and Football lessons. In addition to this, we will be challenged to work with others in team-building activities and test our map-reading skills as part of a variety of OAA lessons. In indoor lessons, we will explore skills needed in the sports of Dodgeball, Volleyball and Badminton.

PSHE:

This term we will learn about setting goals and working together to achieve them. We will discuss how we help one another and recognise our achievements in the wider community. We will also discuss healthy choices including food, drinks, how we look after our emotional and mental health and managing stress and pressure.

RE: In RE, we will be learning about Islam and the Islamic community. We will learn more about each of the five pillars in greater depth to understand more about how these influence everyday life in the Muslim community.

Geography:

After half term, in geography we will be comparing North America with the United Kingdom, carefully considering the similarities and differences in physical and human features.
