

The poster features a blue background with various science-related icons: a microscope, a lightbulb, a brain, tweezers, a skull, a flask with green liquid, a beaker with blue liquid, a heart, and a microscope. The text is centered in a white box.

STEM FAYRE

Passionate about science, technology, engineering or maths? Then TMA's exciting, new 2024 STEM Fayre is for you! We would like you to produce a piece of work to showcase your understanding of an area of science, technology, engineering or maths. You could:

- ⇒ build a model
- ⇒ make a poster or leaflet
- ⇒ produce a display of your own

Ideas could include: A model volcano, string telephones, solar system/space station models, paper aeroplane science, plant diagrams, healthy eating posters, keeping fit information booklets, electrical circuits and much, much more. With any models, remember to include some science instructions or a science explanation to show off your fantastic understanding.

We will be judging them on:

- ⇒ how they demonstrate a scientific, technology, engineering or mathematical idea, their design
- ⇒ how you have explained it.

There will be a winner from each class and then an overall winner and runner up per year group. All participants will have their work displayed in our upcoming **STEM Fayre on Wednesday 24th April 2024** and the overall year group winner will receive a science related prize too!

All entries for all year groups need to be in school by **Friday 19th April.**

Please can we ask that you do not include living things or slime – thank you.

Good luck to everyone and start experimenting!

Mr Turbervill
(Head of Science)

SOME IDEAS TO GET YOU THINKING...
