

Year 6 Curriculum Overview

French:

This term in Year 6, we will continue with our work on time and applying this to being able to explain our school timetable - what subjects we have on what days, at what time and whether or not we like them! We then move on to asking for directions and being able to explain where we can find particular shops. Pupils will learn how to ask for certain food items.

Computing:

During the summer term, Year 6 pupils will be preparing themselves for secondary school by applying the understanding of Computer Science that they have obtained during their time at Two Mile Ash, across a range of different software and hardware platforms.

History:

This term, the children will look at changes in History through the decades. They will investigate and understand more about significant dates in the 20th and 21st centuries as well as changes in fashion, popular music and other aspects of day to day life using both primary and secondary sources.

Science:

This term we will be focusing on the human body and the circulatory system. We will be investigating reasons why our pulse rate changes and how this affects our body. Further into the topic, we will be researching and understanding the changes that we can all make to promote healthy living. Later in the term, we will be having fun with evolution. Dinosaurs will be a key feature, helping us learn about Earth's history. This will lead on to understanding how life has changed and evolved over time, investigating inheritance and looking to the future.

PSHE:

This term, pupils will learn how the human body changes during puberty, focusing on both physical and emotional changes - comparing these changes to that of other animals and mammals. We will learn about reproduction and how a body develops in its mother's womb, learning about the increased need for a healthy lifestyle during this time. We will also identify the qualities of a positive and healthy relationship, as well as strategies to maintain these.

Geography:

In Geography we will be comparing North America and the UK in terms of both human and physical geography. We will be using our skills from previous Geography topics such as Extreme Earth to understand more about the world and investigate the similarities and differences in terms of weather, structures and populations.

PE:

This term, children will show off their skills and leadership qualities in a series of football lessons. In addition to this, they will be challenged to communicate effectively with others in team-building activities and test their endurance when orienteering as part of a variety of OAA lessons. For their indoor lessons, children will further explore skills needed in volleyball and badminton, as well as explore different ideas and emotions through dance.

Art

As part of art we will be focussing on creating art in the style of Hokusai where we will look his 36 views of mount Fuji before creating our own mountainside paintings. We are going to be creating these artworks on different materials including hessian before embroidering them using wool, thread and beads using skills such as stitching, embossing and printing.

DT

This term in Year 6, we are engineers and programmers! As part of DT, we are going to be designing, creating, and evaluating our very own fairground rides.

RE:

In the summer term, pupils will continue to learn about the beliefs of others, specifically focusing on Islam. They will find out about different aspects of this religion such as the religious festivals and pilgrimages.
